

1. 110 MM TUBE.
2. 110 MM/50 MM JOINT.
3. 50 MM STRAIGHT JOINT.
4. 88 DEGEE / 50 MM CORNER JOINT.
5. 50 MM TUBE 150 MM LONG.
6. 50 MM TUBE 700 MM LONG.
7. POTS.
8. BARREL 50 LITER.
9. 30 DEGEE / 50 MM CORNER JOINTS.
10. RACK.
11. CENTER BAR.
12. M 8 SCREWS.
13. LEVEL.
14. ADJUSTABLE FEET.
15. AQUARIUM PUMP.
16. FLEXIBLE TUBE.
17. FLOW REDUCER.
18. SUBSTRATE.
19. PLANT.

ASSEMBLY INSTRUCTION

TUBE SYSTEM CONSISTS OF STANDARD INDOOR DRAIN TUBES. MAKE HOLES SUITABLE FOR YOUR SELECTED POT SIZE, MOST LIKELY 3 INCH PLASTIC POTS.

ROTATE COMPONENT NO 2, IN ORDER TO MAKE THE WATER LEVEL EXACTLY MEET THE BOTTOM OF YOUR POTS.

TUBE GARDEN CAN BE PLACED ON CUSTOM BUILT METAL RACK AS IN THE SKETCH, OR WALL MOUNTED ON FOR EXAMPLE L-SHAPED BRACKETS.

MAKE SURE THE SYSTEM IS LEVELLED! REMEMBER, WATER MOVES.

MAKE SURE YOUR SELECTED AQUARIUM PUMP CAN LIFT WATER TO THE HIGHEST POINT IN THE SYSTEM. FROM THERE, THE WATER SHALL GENTLY FLOAT BACK INTO YOUR BARREL.

USE FERTILIZER BASED ON YOUR PREFERENCES AND THE CROPS YOU GROW.

ADOPT THE LIGHT SOLUTION TO THE CROPS YOU GROW. MOST LIKELY YOU'LL NEED TO ADD ARTIFICIAL LIGHT WHEN CULTIVATING INDOORS. SEASONAL CULTIVATION IS RECOMMENDED.
